Full-Stack Developer

Daniel Kupracz

I'm a big fan of new technologies and I 'm interesting about all news in the technology and IT industry. I've got immunity on stress and I can work under pressure. I quickly adapt to new jobs and quickly find myself in a new team. I try to solve problems promptly. I like meeting new people and I'm open to learning about new cultures. I want to gain a lot of experience in the IT industry and develop myself in new technologies.

“Daniel has finished the full-stack developer course and passed all exams. During the course, he learned and used frameworks and technologies such as Python, Flask, Java, Spring, SpringBoot, SQL, HTML, CSS, JavaScript, and React. Daniel has a good knowledge of software design principles and relational databases. He also understands the ideas and principles behind web and web applications. Daniel can be recommended as a junior developer.”
— Adam Arczyński, mentor CodecoolGlobal
